CAREER OBJECTIVE

Aspiring Data Analyst and Data Scientist seeking an entry-level opportunity in a growth-oriented organization where I can apply analytical thinking, work on real-world business problems, contribute to data-driven decisions, and continue developing my professional skills.

TECHNICAL SKILLS

Data Analytics: Python, SQL, Excel, Power BI, Tableau
Data Science Libraries: Pandas, NumPy, Matplotlib, SciPy
Machine Learning: Scikit-learn, XGBoost, TensorFlow
Deep Learning & Computer Vision: Keras, PyTorch, OpenCV, CNNs, transfer learning
Web Technologies: HTML, CSS, React.js
Database: MySQL
Tools: Jupyter Notebook, VS Code, Git

PROJECTS

E-Commerce Customer Churn Prediction
Tools: *Python, Pandas, Scikit-learn, XGBoost, Streamlit*
Built a machine-learning workflow to predict customer churn. Cleaned and prepared customer data, handled missing values, encoded categorical features, compared Logistic Regression and XGBoost, and created a Streamlit interface for predictions.

FMCG Demand Forecasting
Tools: *Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn*
Developed a demand-forecasting workflow using product, price, promotion, stock, region, and date-related features to predict units sold. Included data preparation, regression modelling, and evaluation using MAE, RMSE, and R^2.

AI-Powered Crop Disease Detection using CNN
Tools: *Python, TensorFlow/Keras, CNN, MobileNetV3, Computer Vision*
Built an image-classification project for tomato leaf conditions using a CNN baseline and MobileNetV3 transfer learning. Structured the dataset into training, validation, and test splits and prepared predictions for healthy and disease categories.

AI-Powered Voice of the Customer Platform
Tools: *Python, NLP, Machine Learning, Streamlit*
Developed a review-intelligence foundation to analyse customer feedback, predict sentiment, identify recurring pain points, and present results through a Streamlit dashboard. Designed for individual and bulk review analysis with model-evaluation support.

Python AI-Powered ATS Resume Analyzer
Tools: *Python, Streamlit, NLP/Text Processing, Regex, PDF/DOCX Parsing, JSON*
Created a resume-analysis tool that extracts resume content, compares keywords with a job description, and produces rule-based matching feedback to help users identify relevant skills and missing keywords.

HR Analysis Dashboard
Tools: *Power BI*
Created an HR analytics dashboard to explore workforce information and present key metrics through interactive visualisations for business intelligence and reporting.

India Corona Analysis Dashboard
Tools: *Tableau*
Created a Tableau dashboard to explore COVID-19 data in India and communicate trends through visual analytics.

INTERNSHIP EXPERIENCE

HR Analysis and Business Intelligence Trainee — Futurewise IT Training Institute, Trichy
Artificial Intelligence Intern — Biglearn IT Training Institute, Trichy
Gained hands-on training experience through practical projects and applied learning. (Add internship dates and specific responsibilities before final submission.)

EDUCATION

Master of Commerce (M.Com) — Srimat Andavan Arts & Science College, Trichy | CGPA: 7.9
Bachelor of Commerce (B.Com) — Srimat Indira Gandhi College, Trichy | CGPA: 7.5

CERTIFICATIONS

Master in Artificial Intelligence | Full Stack Web Development | Stock Market

LANGUAGES

Tamil, English

ADDITIONAL SKILLS

Analytical thinking, problem-solving, dashboard development, data visualisation, and project documentation.
