PROFESSIONAL SUMMARY

Aspiring Data Analyst, Data Scientist, and AI/ML professional seeking an entry-level opportunity to apply Python programming, statistical analysis, machine learning, and data visualization skills to real-world problems. Eager to transform complex datasets into actionable insights, develop predictive models, and contribute to data-driven business decisions.

TECHNICAL SKILLS

Programming Languages: Python, SQL
Data Analytics & Visualization: Excel, Power BI, Tableau, Matplotlib, Seaborn
Data Processing Libraries: Pandas, NumPy, SciPy
Machine Learning: Supervised Learning, Unsupervised Learning, Linear Regression, Logistic Regression, Decision Trees, Random Forest, XGBoost, K-Means Clustering, Feature Engineering, Model Evaluation, Scikit-learn
Deep Learning: ANN, CNN, RNN, LSTM, Transfer Learning, MobileNetV3, TensorFlow, Keras, PyTorch
Natural Language Processing (NLP): Text Preprocessing, Tokenization, TF-IDF, Sentiment Analysis, Text Classification, Aspect-Based Sentiment Analysis
Generative AI: LLM Fundamentals, Transformer Architecture
Computer Vision: Image Preprocessing, Image Classification, OpenCV
Database: MySQL
Web & Application Development: HTML, CSS, React.js, Streamlit
Cloud & Deployment Platforms: Streamlit Community Cloud, Vercel, AWS (Basic Knowledge)
Development Tools: Jupyter Notebook, VS Code, Git, GitaHub

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern
Biglearn IT Training Institute, Trichy | 01 April 2026 – 30 September 2026

- Participated in hands-on artificial intelligence training and project-based learning.
- Applied relevant AI concepts through practical learning activities.

HR Analysis and Business Intelligence Trainee
Futurewise IT Training Institute, Trichy | 01 February 2026 – 30 March 2026

- Participated in HR analytics and business intelligence training.
- Gained practical exposure to workforce analysis and business intelligence concepts.

PROJECTS

1. E-Commerce Customer Churn Prediction | Machine Learning
Technologies: Python, Pandas, NumPy, Scikit-learn, XGBoost, Joblib, Streamlit, Jupyter Notebook

- Processed 50,000 customer records across 25 columns, performing data cleaning, missing-value handling, exploratory data analysis (EDA), and categorical encoding.
- Developed an XGBoost classification workflow to estimate customer churn probabilities and identify potential retention risks.
- Built and deployed an interactive Streamlit dashboard displaying churn predictions, customer risk levels, and retention recommendations.
- Delivered a functional predictive analytics application to support customer retention analysis and data-driven decision-making.

2. FMCG Product Demand Forecasting Using LSTM
Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, Keras, Scikit-learn, Streamlit

- Developed an LSTM-based time-series forecasting model to predict FMCG product demand using historical sales data.
- Performed data preprocessing, feature scaling, and sequential data preparation to support time-series modelling.
- Achieved a Mean Absolute Error (MAE) of 13.47 and Root Mean Squared Error (RMSE) of 17.35, improving MAE by 28.70% over the naive baseline.
- Generated 7-day demand forecasts to support inventory planning and stock management.
- Created an interactive Streamlit application to present forecasts and improve the accessibility of demand insights.

3. AI-Based Crop Disease Detection Using CNN

Technologies: Python, TensorFlow, Keras, CNN, MobileNetV3, NumPy, Pandas, Matplotlib, Streamlit, Git

- Built a custom convolutional neural network (CNN) to classify tomato leaf images into five categories: Healthy, Early Blight, Late Blight, Leaf Mold, and Septoria Leaf Spot.
- Prepared the PlantVillage dataset and established training, validation, and test splits for model development and evaluation.
- Applied MobileNetV3 transfer learning to explore deep-learning-based image classification.
- Achieved 93.20% test accuracy, 92.31% precision, 92.74% recall, and a 92.48% macro F1-score.
- Deployed an interactive Streamlit application for image-based crop disease prediction.

4. AI-Powered Voice of the Customer (VoC) Review Intelligence

Technologies: Python, NLP, Scikit-learn, TF-IDF, Logistic Regression, Pandas, Streamlit

- Developed an NLP-based application to classify customer reviews into Positive, Negative, and Neutral sentiment categories.
- Implemented aspect-based feedback analysis and pain-point identification using rule-based phrase matching.
- Applied TF-IDF text representation and Logistic Regression for text classification.
- Built an interactive Streamlit dashboard supporting individual-review and bulk CSV analysis.
- Generated customer feedback insights to help identify sentiment patterns and recurring concerns.

5. ATS Resume Intelligence & Job Matching System

Technologies: Python, Streamlit, NLP, Regex, PDF/DOCX Parsing, JSON, Rule-Based Scoring, Text Processing

- Developed a Streamlit application to evaluate resumes against job descriptions using skill extraction, ATS-style scoring, and keyword matching.
- Implemented missing-skill identification to highlight gaps between candidate qualifications and job requirements.
- Integrated PDF and DOCX parsing to extract resume content for automated analysis.
- Added job-role recommendations and downloadable analysis reports.
- Automated resume evaluation and job-description matching to provide skill-gap insights and career recommendations.

6. HR Analysis Dashboard

Technology: Power BI

- Created an interactive HR analytics dashboard to explore workforce data and present key workforce metrics.
- Organised HR information into visual reports to support business intelligence and data-driven analysis.

7. India Corona Analysis Dashboard

Technology: Tableau

- Developed a Tableau dashboard to explore COVID-19 data in India.
- Presented data trends through visual analytics to support clear interpretation of public health **information**

EDUCATION

Master of Commerce (M.Com) **2024 - 2026**

Srimat Andavan Arts & Science College, Trichy

Bachelor of Commerce (B.Com) **2021 - 2024**

Srimat Indira Gandhi College, Trichy

CERTIFICATIONS

- Master in Artificial Intelligence
- Full Stack Web Development
- Stock Market

PROFESSIONAL STRENGTHS

- Analytical Thinking and Problem-Solving
- Data Cleaning and Exploratory Data Analysis
- Predictive Modelling and Model Evaluation
- Dashboard Development and Data Visualization

LANGUAGES

- Tamil
- English
